Subject index

Ammonia
Electrochemical studies of lithium tetrasulphide in solution in liquid ammonia (Jehoulet et al.) 153
Aqueous/organic solution interface
Effect of temperature on ion transfer at the aqueous/organic solution interface studied by current-scan polarography with the electrolyte solution dropping electrode (Suzuki et al.) 231

Benzotriazole
A new approach in electrolytic photography (Fujiwara, Kawajiri) 273
A new organic electrolyte material for dry electrolytic photography (Fujiwara et al.) 263

Calcium perchlorate
Kinetics of the Cu^{2+}/Cu^{+} electrode reaction at gold in concentrated aqueous $Ca(ClO_4)_2$ solutions (Stępnik-Świątek, Małyszko) 175
Carbon dioxide
Electrocatalytic reduction of CO_2 by nickel(II) cyclam. Study of the reduction mechanism on mercury by cyclic voltammetry, polarography and electrocapillarity (Fujihara et al.) 199
Colorimetry
Colorimetric study of the electrochromic properties of a conducting polymer (Hyodo, Omae) 93
Conductive zones
Monte Carlo simulation of two-dimensional growth of conductive zones in interconversion of conducting polymer films involving random morphology (Aoki) 63
Stochastic property in the propagation of a conductive zone in electroactive conducting polymers (Aoki) 53
Conductors
Interfacial potential differences at mixed conductor interfaces: Nernst, Nernst–Donnan, Nernst Distribution and generalizations (Buck, Vanýsek) 73
Copper
Kinetics of the Cu^{2+}/Cu^{+} electrode reaction at gold in concentrated aqueous $Ca(ClO_4)_2$ solutions (Stępnik-Świątek, Małyszko) 175
Current-scan polarography
Effect of temperature on ion transfer at the aqueous/organic solution interface studied by current-scan polarography with the electrolyte solution dropping electrode (Suzuki et al.) 231
Cyclopentadienyl ligand
The electrochemical reduction of Cp^*Rh complexes (Koelle) 217

3,7-Diaminophenoxazine
A comparative study of some 3,7-diaminophenoxazine derivatives and related compounds for electrocatalytic oxidation of NADH (Persson, Gorton) 115
Double layer effects
Double layer effects on the enthalpy of activation of heterogeneous electron transfer reactions (Fawcett, Kováčová) 9

Electrochemical processes
An algorithm of general application for the digital simulation of electrochemical processes (Rudolph) 1
Electrochromic properties
Colorimetric study of the electrochromic properties of a conducting polymer (Hyodo, Omae) 93
Electrochromic thin films
A novel stable electrochromic thin film: a Prussian Blue analogue based on palladium hexacyanoferrate (Jiang, Zhao) 281

Electrolyte solution dropping electrode
Effect of temperature on ion transfer at the aqueous/organic solution interface studied by current-scan polarography with the electrolyte solution dropping electrode (Suzuki et al.) 231
Electrolytic photography
A new approach in electrolytic photography (Fujiwara, Kawajiri) 273
A new organic electrolyte material for dry electrolytic photography (Fujiwara et al.) 263
Enthalpy of activation
Double layer effects on the enthalpy of activation of heterogeneous electron transfer reactions (Fawcett, Kováčová) 9

Glassy carbon
Preparation and characterization of mixed-valent titanium hexacyanoferrate film modified glassy carbon electrodes (Jiang et al.) 289
Gold
Kinetics of the Cu^{2+}/Cu^{+} electrode reaction at gold in concentrated aqueous $Ca(ClO_4)_2$ solutions (Stępnik-Świątek, Małyszko) 175

Heterogeneous electron transfer
Double layer effects on the enthalpy of activation of heterogeneous electron transfer reactions (Fawcett, Kováčová) 9
Hydrophobic mediator
Transmembrane electron transfer through a new hydrophobic mediator incorporated in monolayer assemblies on metal electrodes (Kunitake et al.) 277

Interfacial potential differences
Interfacial potential differences at mixed conductor interfaces: Nernst, Nernst–Donnan, Nernst Distribution and generalizations (Buck, Vanýsek) 73

Lithium tetrasulphide
Electrochemical studies of lithium tetrasulphide in solution in liquid ammonia (Jehoulet et al.) 153

Mercaptopyridines
Surface chemistry of mercaptopyridines at Ag(111) electrodes studied by EELS, LEED, Auger spectroscopy and electrochemistry (Gui et al.) 245

Mercury
Electrocatalytic reduction of CO_2 by nickel(II) cyclam. Study of the reduction mechanism on mercury by cyclic voltammetry, polarography and electrocapillarity (Fujihara et al.) 199
Photoelectron injection from mercury into aqueous electrolyte solutions in the range 427–192 nm (Konovalov et al.) 33
Methanol
The scheme of methanol oxidation at a platinum electrode in an acid solution (Matsui, Kunugi) 103
Microelectrode voltammetry
Microelectrode voltammetry of TCNQ in aprotic solvent at low concentrations of non-reducing and reducing salts (Kamau, Rusling) 187
Morphology
Monte Carlo simulation of two-dimensional growth of conductive zones in interconversion of conducting polymer films involving random morphology (Aoki) 63

Nernst, Nernst–Donnan, Nernst Distribution
Interfacial potential differences at mixed conductor interfaces: Nernst, Nernst–Donnan, Nernst Distribution and generalizations (Buck, Vanýsek) 73
Nickel
Electrocatalytic reduction of CO_2 by nickel(II) cyclam. Study of the reduction mechanism on mercury by cyclic voltammetry, polarography and electrocapillarity (Fujihara et al.) 199
Nicotinamide adenine dinucleotide
A comparative study of some 3,7-diaminophenoxazine derivatives and related compounds for electrocatalytic oxidation of NADH (Persson, Gorton) 115
Numerical integration
An algorithm of general application for the digital simulation of electrochemical processes (Rudolph) 1

Palladium hexacyanoferrate
A novel stable electrochromic thin film: a Prussian Blue analogue based on palladium hexacyanoferrate (Jiang, Zhao) 281
Photoelectron injection
Photoelectron injection from mercury into aqueous electrolyte solutions in the range 427–193 nm (Konovalov et al.) 33

Photography
A new approach in electrolytic photography (Fujiwara, Kawajiri) 273
A new organic electrolyte material for dry electrolytic photography (Fujiwara et al.) 263
Platinum
The scheme of methanol oxidation at a platinum electrode in an acid solution (Matsui, Kunugi) 103
Polymers
Colorimetric study of the electrochromic properties of a conducting polymer Hyodo, Omae) 93
Monte Carlo simulation of two-dimensional growth of conductive zones in interconversion of conducting polymer films involving random morphology (Aoki) 63
Stochastic property in the propagation of a conductive zone in electroactive conducting polymers (Aoki) 53
Polysulphides
Detection of sulphur and polysulphides on electrochemically oxidized pyrite surfaces by X-ray photoelectron spectroscopy and Raman spectroscopy (Mycroft et al.) 139
Prussian Blue
A novel stable electrochromic thin film: a Prussian Blue analogue based on palladium hexacyanoferrate (Jiang, Zhao) 281
Pyrite
Detection of sulphur and polysulphides on electrochemically oxidized pyrite surfaces by X-ray photoelectron spectroscopy and Raman spectroscopy (Mycroft et al.) 139

Reducing salts
Microelectrode voltammetry of TCNQ in aprotic solvent at low concentrations of non-reducing and reducing salts (Kamau, Rusling) 187
Rhodium
The electrochemical reduction of Cp*Rh complexes (Koelle) 217

Silver
A new approach in electrolytic photography (Fujiwara, Kawajiri) 273
A new organic electrolyte material for dry electrolytic photography (Fujiwara et al.) 263
Surface chemistry of mercaptopyridines at Ag(111) electrodes studied by EELS, LEED, Auger spectroscopy and electrochemistry (Gui et al.) 245
Simulation
An algorithm of general application for the digital simulation of electrochemical processes (Rudolph) 1
Stochastic properties
Stochastic property in the propagation of a conductive zone in electroactive conducting polymers (Aoki) 53
Sulphur
Detection of sulphur and polysulphides on electrochemically oxidized pyrite surfaces by X-ray photoelectron spectroscopy and Raman spectroscopy (Mycroft et al.) 139

Tetracyanoquinonedimethane
Miocroelectrode voltammetry of TCNQ in aprotic solvent at low concentrations of non-reducing and reducing salts (Kamau, Rusling) 187
Titanium hexacyanoferrate
Preparation and characterization of mixed-valent titanium hexacyanoferrate film modified glassy carbon electrodes (Jiang et al.) 289
Transmembrane electron transfer
Transmembrane electron transfer through a new hydrophobic mediator incorporated in monolayer assemblies on metal electrodes (Kunitake et al.) 277
Two-dimensional growth
Monte Carlo simulation of two-dimensional growth of conductive zones in interconversion of conducting polymer films involving random morphology (Aoki) 63
